Knowing how to buy Equine Performance Mineral can save you a lot of money.

Many equine mineral manufacturers package their products differently, making them hard to compare. Minerals come in basically three forms, oxide, sulfate and chelated. Stewart Equine Performance Mineral uses chelated minerals which is the most digestible form.

The chart below assumes a feeding rate of 2 oz. per day per horse, on all minerals. Our mineral can be fed free choice as well. What value proposition will you choose for your horse?

Please review our guaranteed analysis and ingredients for comparison purposes, since not all equine minerals contain exactly the same ingredients.

Brand	Competitor		Stewart Equine Mineral	
	Annual per horse cost	2 oz. per day cost	Horse owner savings per year	Horse owner savings per day
Alltech Life Force Sold in 11 lb. pail = 90 scoops \$135.00* per pail	\$540.00	\$1.48	\$400.00	\$1.13
Equipase Sold in 8 lb. pail = 64 scoops \$71.00* per pail	\$404.00	\$1.11	\$264.00	\$.76
