Equine Performance Mineral

Developed for Maximum Performance. Packaged for Maximum Value.

When it comes to equine athletes, peak performance is the key to winning. As we ask more from our horses, they need a full spectrum of essential nutrients.

Stewart Equine Performance Mineral is a once-a-day nutritional supplement developed to:

- Can be fed free choice or controlled
- Strengthen the immune system
- Improve body condition and muscle tone
- Boost hoof health
- Support breeding performance
- Promote better digestion
- Improve feed efficiency

Created by a Performance Horseman for Performance Horses.

Fellow Horse Owner,

I've been using equine supplements for 30 plus years, and always wanted something more than I was getting.

Over eight years ago I developed my own formula with some of the best nutritionists in the country. This formula has proven to make a visible difference within 4 to 6 weeks in all my horses, regardless of breed, age or condition.

Now I'm happy to make the same great results available to you, because we all want our horses to perform at their peak.

Nat Stewart
